SUMMARY

Software Engineering graduate with hands-on experience developing web, mobile, and desktop applications through internship, academic, and project-based work. Experienced in backend development, REST API integration, database management, and application development using Laravel, PHP, JavaScript, Node.js, Ionic, Java, and C#. Proficient in Object-Oriented Programming (OOP), MVC architecture, CRUD operations, MySQL, and Git/GitHub, with practical experience building and integrating application features across end-to-end development workflows.

EDUCATION

Institut Teknologi dan Bisnis Indonesia (ITBI), Tandem, Indonesia

Aug 2022 - Sep 2026

Bachelor of Software Engineering (S.Kom.)

GPA: 3.80/4.00

- Awardee student exchange batch 4 by Kampus Merdeka program 2024

WORK EXPERIENCES

Institut Teknologi dan Bisnis Indonesia - Tandem, Indonesia

Jun - Oct 2025

Web Development - PKL

- Designed and implemented PMM Connect, a web-based portal for documenting and sharing experiences of student exchange participants.
- Developed multi-level authentication and role-based access for participants, university coordinators, and public users.
- Implemented core features including multimedia documentation, monitoring dashboard, discussion forum, comments, and structured user data management.
- Applied Adonis.js, database management, input validation, and responsive web design during system development.

Eduwork - Yogyakarta, Indonesia

May - Sep 2025

Programmer - Internship (Online)

- Developed and maintained web applications using Laravel and PHP, implementing backend features and application workflows.
- Optimized database structures and UI layouts to improve application organization, usability, and performance.
- Contributed to updates and improvements for the Social Vit Admin website based on functional and administrative requirements.
- Used Git and GitHub for version control and collaborative software development workflows.

Institut Teknologi dan Bisnis Indonesia - Binjai, North Sumatera

Nov 2024 - Feb 2025

Mobile Programming (Permo App) - Seasonal (Onsite)

- Developed a mobile application using Ionic Framework, Node.js, JavaScript, and HTML/CSS, implementing application features to support agricultural information access.
- Integrated real-time temperature data into the application, enabling dynamic environmental monitoring to support data-driven agricultural features.
- Developed a crop recommendation feature based on environmental data, applying application logic to provide relevant recommendations for users.
- Designed an agricultural vocabulary search feature, enabling users to efficiently access and search relevant agricultural terminology.

Student Exchange batch 4 - Seasonal (Onsite)

- Collaborated in a team to develop TodoList and ApliKasir desktop applications as part of software development activities during the student exchange program.
 - Developed the TodoList application using Java and JDBC, implementing task management functionality and database connectivity.
 - Developed the ApliKasir application using C# and Visual Studio, implementing transaction processing and user interface functionality for cashier management.
 - Applied Object-Oriented Programming (OOP), database integration, system security, and Linux/Xinu environments through hands-on development activities.
-

PROJECT EXPERIENCES**Moodle Source Code Quality Evaluation - SonarQube***Bachelor's Thesis | 2026*

- Evaluated the quality of six built-in Moodle modules using static code analysis with SonarQube.
- Analyzed Lines of Code (LOC), Maintainability Rating, Reliability Issues (Bugs), Code Smells, Cyclomatic Complexity, Code Duplication, and Defect Density.
- Analyzed relationships between Defect Density and code metrics and applied data-driven thresholds to assess software quality and maintenance priorities.
- Designed source code, process, and interface improvement recommendations based on identified quality issues.

Social Vit - Laravel*Internship Project | Eduwork*

- Developed a web application using Laravel and PHP, implementing backend functionality and database integration for core application workflows.
 - Integrated application features with structured database operations to support reliable data processing.
-

TECHNICAL SKILLS

- Programming Languages : C#, Java, JavaScript, PHP
 - Frameworks & Libraries : Laravel, Ionic Framework, Node.js, Adonis.js,
 - Backend & Software Engineering : REST API, MVC Architecture, Object-Oriented Programming (OOP), CRUD Operations
 - Database & Data Access : MySQL, Firebase, JDBC
 - Web Technologies : HTML5, CSS3, JSON, Tailwind CSS
 - Tools & Platforms : Git, GitHub, Visual Studio, NetBeans, Visual Studio Code, Vercel
 - Additional Technologies : Angular, Vue
-

LANGUAGE

- Indonesia : Proficient
- TOEFL (437).
